Subject index*

A

Abstracts of papers presented at Sectional Meeting of ARO, 232, 351, 459, 647

Adaptation and retinitis pigmentosa, effect of, electrically evoked response of visual system (Potts and Inoue), 605

Adenovirus type 3 infection, ocular, comparison of methods for laboratory diagnosis of (Ellison, Kaufman, and Little), 484

Allergic uveitis, experimental (Wacker, Barbee, and Macdonald), 381

Alloxan diabetes, effect on fatty acid composition of retina (Futterman, Sturtevant, and Kupfer), 542

Angle, anterior chamber, development (Kupfer), 69

Angle-closure glaucoma, light-induced, in domestic fowl (Smith, Becker, and Podos), 213

Announcements, 132, 242, 355, 466, 561, 658

Anterior chamber angle, development (Kupfer), 69

Antibody formation by single cells during experimental immunogenic uveitis (Smith, Jensen, and Silverstein), 373

and interferon, role of, in vesicular stomatitis virus infection in rabbit eye (Pollikoff, DiPuppo, and Cannavale), 488

Antilymphocyte serum, effect of, on development of immunogenic uveitis, ocular immune response (Burde and Waltman), 583

use to prevent immune rejection of penetrating corneal homografts (Waltman, Faulkner, and Burde), 196

Applanation, electronic, tonometry in corneal edema and keratoplasty (Wind and Irvine), 620

Aqueous flow and entry of cycloleucine into aqueous humor of vervet monkeys *(Cercopithecus copithecus ethiops)*, in Bill), 434

into aqueous humor of vervet monkeys *(Cercopithecus ethiops)*, influence of intraocular pressure and some drugs on (Wålinder and Bill), 446

humor formation rate and outflow facility, effect of corticosteroids on (Oppelt, White, and Halpert), 535

of vervet monkeys *(Cercopithecus ethiops)*, aqueous flow and entry of cycloleucine into (Wålinder and Bill), 434

influence of intraocular pressure and some drugs on aqueous flow and entry of cycloleucine into (Wålinder and Bill), 446

Arcuate scotoma, differential diagnosis (Harrington), 96

Arterial tensions, normal and increased, oxygen supply to retina from retinal and choroidal circulations at (Dollery, Bulpitt, and Kohner), 588

B

Basement membrane, synthesis by corneal epithelium in bullous keratopathy (Kenyon), 156

Binocular disparity, kinetic and static function (Crone), 561

Biochemical evaluation of cataract induced in high-glucose medium (Chylack and Kinoshita), 401

Bjerrum area in ocular hypertension (Pinkerton), 91

Blood flow, vortex vein, in animals, Doppler measurement of (Schlegel and Lawrence), 201

Bodies, Russell, in iris of chronic uveitis patient, light and electron microscopy on plasma cells and (Iwamoto and Witmer), 563

Book reviews, 621, 659

Brain pathology following fetal vascular occlusion, experimental study (Myers), 41

Butylsympatol, phenylephrine, pilocarpine, and lithium, effects of, on runout of ^{86}Rb from isolated rabbit ciliary processes (Vale and Bárány), 422

C

Calcification, corneal, experimental in animals treated with dihydrotachysterol (Obenberger, Ocumpaugh, and Cubberly), 467

Carotid occlusion, common, and ocular volume in rabbit (Best, Pola, and Galin), 365

Cataract, chlorpromazine, experimental (Howard, McDonald, Dunn, and Creasy), 413

galactose, changes in protein distribution during development (Philipson), 281

galactose-induced, electron microscopic study (Kuwabara, Kinoshita, and Cogan), 133

induced in high-glucose medium, biochemical evaluation of (Chylack and Kinoshita), 401

*February, pp. 1-132; April, pp. 133-244; June, pp. 245-356; August, pp. 357-466; October, pp. 467-562; December, pp. 563-674.

Cataract—Cont'd
x-ray, lenses with, distribution of protein within (Philipson), 271
Cell(s) layers of cornea, individual, transplantation and rejection (Khodadoust and Silverstein), 180
plasma, and Russell bodies in iris of chronic uveitis patient, light and electron microscopy on (Iwamoto and Witmer), 563
single, antibody formation by, during experimental immunogenic uveitis (Smith, Jensen, and Silverstein), 373
specialization, mechanisms of (Herrmann), 17
Chamber, anterior, angle, development (Kupfer), 69
Chlorpromazine cataracts, experimental (Howard, McDonald, Dunn, and Creasy), 413
Choroidal and retinal circulations at normal and increased arterial tensions, oxygen supply from retina to (Dollery, Bulpitt, and Kohner), 588
Ciliary processes, isolated, rabbit, runout of ^{86}Rb from, effects of phenylephrine, butylsympatol, pilocarpine, and lithium on (Vale and Bárány), 422
Common carotid occlusion and ocular volume in rabbit (Best, Pola, and Galin), 365
Cones and rods, difference between, in renewal of outer segment protein (Young), 222
Conjunctival and corneal changes in dysproteinemia (Pinkerton and Robertson), 357
Contusion injuries, relation to deformation of globe under high-speed impact (Delori, Pomerantzeff, and Cox), 290
Cornea, individual cell layers, transplantation and rejection (Khodadoust and Silverstein), 180
rabbit, evaporation rate of water from precorneal tear film and (Iwata, Lemp, Holly, and Dohlman), 613
sodium-potassium dependent inorganic ^{35}S-sulfate incorporation into (Wortman and Locke), 150
Corneal calcification, experimental, in animals treated with dihydrotachysterol (Obenberger, Ocumpaugh, and Cubberly), 467
and conjunctival changes in dysproteinemia (Pinkerton and Robertson), 357
edema and keratoplasty, electronic applanation tonometry in (Wind and Irvine), 620
epithelium, synthesis of basement membrane by, in bullous keratopathy (Kenyon), 156
homografts, penetrating, immune rejection of, use of antilymphocytic serum to prevent (Waltman, Faulker, and Burde), 196
macular dystrophy, histochemistry of (Garner), 475
transplants, experimental, survival and rejection of epithelium in (Khodadoust and Silverstein), 169
Cortical vitreous cells (hyalocytes) after photocoagulation, mitotic activity in (Gloor), 633
Corticosteroids, effect on aqueous humor formation rate and outflow facility (Oppelt, White, and Halpert), 535
Coulombre, Dr. Alfred J., presentation to, of Friedenwald Award in Ophthalmology (von Sallmann), 246
Cultured lens epithelium, characteristics of (Shapiro, Siegel, Scharff, and Robbins), 393
Cycloleucine, entry of, and aqueous flow into aqueous humor of vervet monkeys *(Cercopithecus ethiops)* (Wålinder and Bill), 434
into aqueous humor of vervet monkeys *(Cercopithecus ethiops)*, influence of intraocular pressure and some drugs of (Wålinder and Bill), 446

D

Diabetes, alloxan, effect on fatty acid composition of retina (Futterman, Sturtevant, and Kupfer), 542
Dihydrotachysterol, experimental corneal calcification in animals treated with (Obenberger, Ocumpaugh, and Cubberly), 467
Doppler measurement of vortex vein blood flow in animals (Schlegel and Lawrence), 201
Dysproteinemia, corneal and conjunctival changes in (Pinkerton and Robertson), 357
Dystrophy, retinal, in rat, pigment epithelial disease (Herron, Riegel, Myers, and Rubin), 595

E

Edema, corneal, and keratoplasty, electronic applanation tonometry in (Wind and Irvine), 620
Editorial (Becker), 1
Electrically evoked response of visual system, effect of adaptation and retinitis pigmentosa (Potts and Inoue), 605
Electron and light microscopy on plasma cells and Russell bodies in iris of chronic uveitis patient (Iwamoto and Witmer), 563
microscopic study of galactose-induced cataract (Kuwabara, Kinoshita, and Cogan), 133
microscopy of experimental uveitis (Segawa and Smelser), 497

Electronic applanation tonometry in corneal edema and keratoplasty (Wind and Irvine), 620
Electrophysiological and psychophysical study of two forms of congenital night blindness (Auerbach,, Godel, and Rowe), 332
Electroretinogram, human, and occipital potential in response to focal illumination of retina (Jacobson, Kawasaki, and Hirose), 545
Ellipsoid of photoreceptor cells of vertebrate retinas, atypical mitochondria in (Ishikawa and Yamada), 302
Embryonic development, molecular basis (Massaro), 3
symposium (Smelser, Chairman), 2
Epithelial disease, pigment, retinal dystrophy in rat (Herron, Riegel, Myers, and Rubin), 595
Epithelium, corneal, synthesis of basement membrane by, in bullous keratopathy (Kenyon), 156
lens, cultured, characteristics of (Shapiro, Siegel, Scharff, and Robbins), 393
survival and rejection in experimental corneal transplants (Khodadoust and Silverstein), 169
Evaporation rate of water from precorneal tear film and cornea in rabbit (Iwata, Lemp, Holly, and Dohlman), 613
Eye, ability to distinguish which one was stimulated by light (Enoch, Goldmann, and Sunga), 317
primate, development, effect of intrauterine surgical procedures (von Sallmann), 51

F

Facility of outflow, integral solution of formula for (McEwen, Lyon, Shepherd, and Hibbard), 206
Fatty acid composition of retina, effect of alloxan diabetes on (Futterman, Sturtevant, and Kupfer), 542
Fetal retina, monkey, and x-rays (Rugh and Skaredoff), 31
vascular occlusion, brain pathology following, experimental study (Myers), 41
Field defects, early, in glaucoma (Drance), 84
visual, defect and ocular pressure level in open angle glaucoma (Armaly), 105
examination in glaucoma (Lynn), 76
Formula for facility of outflow, integral solution of (McEwen, Lyon, Shepherd, and Hibbard), 206
Fowl, domestic, light-induced angle-closure glaucoma in (Smith, Becker, and Podos), 213
Free amino acids and myo-inositol in galactose-exposed lens, changes in levels of (Kinoshita, Barber, Merola, and Tung), 625
Friedenwald Award in Ophthalmology, presentation of, to Dr. Alfred J. Coulombre (von Sallmann), 246
remarks on acceptance (Coulombre), 248

G

Galactose cataract, changes in protein distribution during development (Philipson), 281
Galactose-exposed lens, changes in levels of free amino acids and myo-inositol in (Kinoshita, Barber, Merola, and Tung), 625
Galactose-induced cataract, electron microscopic study (Kuwabara, Kinoshita, and Cogan), 133
Glaucoma, early field defects in (Drance), 84
Glaucoma—Cont'd
effect on visual function, symposium (Drance, Chairman), 75
light-induced angle-closure, in domestic fowl (Smith, Becker, and Podos), 213
open angle, visual field defect and ocular pressure level (Armaly), 105
visual field in, examination (Lynn), 76
Globe, deformation under high-speed impact, relation to contusion injuries (Delori, Pomerantzeff, and Cox), 290

H

Herpes simplex virus, recurrence in rabbit eyes, results of three-year study (Laibson and Kibrick), 346
High-glucose medium, biochemical evaluation of cataract induced in (Chylack and Kinoshita), 401
Homografts, corneal, penetrating, immune rejection of, use of antilymphocytic serum to prevent (Waltman, Faulkner, and Burde), 196
Homologous retina, immunization with, manifestations of allergic uveitis produced in guinea pig by (Wacker, Barbee, and Macdonald), 381
Humor, aqueous, of vervet monkeys *(Cercopithecus ethiops)*, aqueous flow and entry of cycloleucine into (Wålinder and Bill), 434
(Cercopithecus ethiops), influence of intraocular pressure and some drugs on aqueous flow and entry of cycloleucine into (Wålinder and Bill), 446
Hyalocytes, cortical vitreous cells, mitotic activity in, after photocoagulation (Gloor), 633

Hypertension, ocular, Bjerrum area in (Pinkerton), 91

I

Illumination, focal, of retina, human electroretinogram and occipital potential in response to (Jacobson, Kawasaki, and Hirose), 545

Immune rejection of penerating corneal homografts, use of antilymphocytic serum to prevent (Waltman, Faulkner, and Burde), 196

response, ocular, effect of antilymphocyte serum on development of immunogenic uveitis (Burde and Waltman), 583

ocular, modification (Waltman, Faulkner, and Burde), 196

Immunization with homologous retina, manifestations of allergic uveitis produced in guinea pig by (Wacker, Barbee, and Macdonald), 381

Immunogenic experimental uveitis, antibody formation by single cells during (Smith, Jensen, and Silverstein), 373

uveitis, effect of antilymphocyte serum on development of, ocular immune response (Burde and Waltman), 583

Infection, ocular adenovirus type 3, comparison of methods for laboratory diagnosis of (Ellison, Kaufman, and Little), 484

Integral solution of formula for facility of outflow (McEwen, Lyon, Shepherd, and Hibbard), 206

Interferon and antibody, role of, in vesicular stomatitis virus infection in rabbit eye (Pollikoff, DiPuppo, and Cannavale), 488

Intraocular pressure and some drugs, influence of, on aqueous flow and entry of cycloleucine into aqueous humor of vervet monkeys *(Cercopithecus ethiops)* (Wålinder and Bill), 446

Intrauterine surgical procedures, effect on development of primate eye (von Sallmann), 51

Iris of chronic uveitis patient, light and electron microscopy on plasma cells and Russell bodies in (Iwamoto and Witmer), 563

K

Keratopathy, bullous, synthesis of basement membrane by corneal epithelium in (Kenyon), 156

Keratoplasty, electronic applanation tonometry in cornea edema and (Wind and Irvine), 620

L

Laboratory diagnosis of ocular adenovirus type 3 infection, comparison of methods for (Ellison, Kaufman, and Little), 484

Lens development, size, shape, orientation (Coulombre and Coulombre), 251

epithelium, cultured, characteristics of (Shapiro, Siegel, Scharff, and Robbins), 393

galactose-exposed, changes in levels of free amino acids and myo-inositol in (Kinoshita, Barber, Merola, and Tung), 625

rat, normal, distribution of protein within (Philipson), 258

Lenses with x-ray cataract, distribution of protein within (Philipson), 271

Light, ability to distinguish which eye was stimulated by (Enoch, Goldmann, and Sunga), 317

and electron microscopy on plasma cells and Russell bodies in iris of chronic uveitis patient (Iwamoto and Witmer), 563

Light-induced angle-closure glaucoma in domestic fowl (Smith, Becker, and Podos), 213

Lithium, phenylephrine, butylsympatol, and pilocarpine, effects of, on runout of ^{86}Rb from isolated rabbit ciliary processes (Vale and Bárány), 422

M

Macular dystrophy, corneal, histochemistry of (Garner), 475

Membrane, basement, synthesis by corneal epithelium in bullous keratopathy (Kenyon), 156

Microscopy, light and electron, on plasma cells and Russell bodies in iris of chronic uveitis patient (Iwamoto and Witmer), 563

Mitochondria, atypical, in ellipsoid of photoreceptor cells of vertebrate retinas (Ishikawa and Yamada), 302

Mitotic activity in cortical vitreous cells (hyalocytes) after photocoagulation (Gloor), 633

Molecular basis of embryonic development (Massaro), 3

Monkey fetal retina and x-rays (Rugh and Skaredoff), 31

Morphogenesis, ocular, regulation of (Coulombre), 25

Myo-inositol in galactose-exposed lens, changes in levels of free amino acids and (Kinoshita, Barber, Merola, and Tung), 625

N

Night blindness, congenital, electrophysiological and psychophysical study of two forms of (Auerbach, Godel, and Rowe), 332

O

Occipital potential and human electroretinogram in response to focal illumination of retina (Jacobson, Kawasaki, and Hirose), 545

Occlusion, carotid, common, and ocular volume in rabbit (Best, Pola, and Galin), 365

Ocular adenovirus type 3 infection, comparison of methods for laboratory diagnosis of (Ellison, Kaufman, and Little), 484

hypertension, Bjerrum area in (Pinkerton), 91

immune response, effect of antilymphocyte serum on development of immunogenic uveitis (Burde and Waltman), 583

modification (Waltman, Faulkner, and Burde), 196

morphogenesis, regulation of (Coulombre), 25

pressure level and visual field defect in open angle glaucoma (Armaly), 105

volume and common carotid occlusion in rabbit (Best, Pola, and Galin), 365

Outflow, facility of, integral solution of formula for (McEwen, Lyon, Shepherd, and Hibbard), 206

Oxygen supply to retina from retinal and choroidal circulations at normal and increased arterial tensions (Dollery, Bulpitt, and Kohner), 588

P

Pathology, brain, following fetal vascular occlusion, experimental study (Myers), 41

Phenylephrine, butylsympatol, pilocarpine, and lithium, effects of, on runout of ^{86}Rb from isolated rabbit ciliary processes (Vale and Bárány), 422

Photocoagulation, mitotic activity in cortical vitreous cells (hyalocytes) after (Gloor), 633

Photoreceptor cells of vertebrate retinas, ellipsoid of, atypical mitochondria in (Ishikawa and Yamada), 302

Pigment epithelial disease, retinal dystrophy in rat (Herron, Riegel, Myers, and Rubin), 595

Pilocarpine, phenylephrine, butylsympatol, and lithium, effects of, on runout of ^{86}Rb from isolated rabbit ciliary processes (Vale and Bárány), 422

Plasma cells and Russell bodies in iris of chronic uveitis patient, light and electron microscopy on (Iwamoto and Witmer), 563

Polymers, vitreous, studies on incorporation of U-^{14}C-glucose into, in vitro and in vivo (Berman and Gombos), 521

Potassium-sodium dependent inorganic ^{35}S-sulfate incorporation into cornea (Wortman and Locke), 150

Precorneal tear film and cornea in rabbit, evaporation rate of water from (Iwata, Lemp, Holly, and Dohlman), 613

Pressure, intraocular, and some drugs, influence of, on aqueous flow and entry of cycloleucine into aqueous humor of vervet monkeys *(Cercopithecus ethiops)* (Wålinder and Bill), 446

ocular, level and visual field defect in open angle glaucoma (Armaly), 105

Primate eye, development, effect of intrauterine surgical procedures (von Sallmann), 51

October National Meeting, 465

Spring Meeting of ARO, 125

Program, Spring National Meeting, ARO, 656

Protein distribution, changes in, during development of galactose cataract (Philipson), 281

within lenses with x-ray cataract (Philipson), 271

within normal rat lens (Philipson), 258

outer segment, renewal of, difference between rods and cones in (Young), 222

Psychophysical and electrophysiological study of two forms of congenital night blindness (Auerbach, Godel, and Rowe), 332

Publications of Dr. Alfred J. Coulombre, 250

R

Rabbit, evaporation rate of water from the precorneal tear film and cornea in (Iwata, Lemp, Holly, and Dohlman), 613

ocular volume and common carotid occlusion in (Best, Pola, and Galin), 365

Rat lens, normal, distribution of protein within (Philipson), 258
retina, development (Weidman and Kuwabara), 60
^{86}Rb, runout of, from isolated rabbit ciliary processes, effects of phenylephrine, butylsympatol, pilocarpine, and lithium on (Vale and Bárány), 422
Retina(s), fatty acid composition of, effect of alloxan diabetes on (Futterman, Sturtevant, and Kupfer), 542
fetal, monkey, and x-rays (Rugh and Skaredoff), 31
focal illumination of, human electroretinogram and occipital potential in response to (Jacobson, Kawasaki, and Hirose), 545
homologous, immunization with, manifestations of allergic uveitis produced in guinea pig by (Wacker, Barbee, and Macdonald), 381
oxygen supply to, from retinal and choroidal circulations at normal and increased arterial tensions (Dollery, Bulpitt, and Kohner), 588
rat, development (Weidman and Kuwabara), 60
vertebrate, ellipsoid of photoreceptor cells of, atypical mitochondria in (Ishikawa and Yamada), 302
Retinal and choroidal circulations at normal and increased arterial tensions, oxygen supply to retina from (Dollery, Bulpitt, and Kohner), 588
dystrophy in rat, pigment epithelial disease (Herron, Riegel, Myers, and Rubin), 595
Retinitis pigmentosa, effect of adaptation and, electrically evoked response of visual system (Potts and Inoue), 605
Rods and cones, difference between, in renewal of outer segment protein (Young), 222
Russell bodies in iris of chronic uveitis patient, light and electron microscopy on plasma cells and (Iwamoto and Witmer), 563

S

Scotoma, arcuate, differential diagnosis (Harrington), 96
Sodium-potassium dependent inorganic ^{35}S-sulfate incorporation into cornea (Wortman and Locke), 150
Stomatitis virus infection, vesicular, in rabbit eye, role of antibody and interferon (Pollikoff, DiPuppo, and Cannavale), 488
^{35}S-sulfate, sodium-potassium dependent, incorporation into cornea (Wortman and Locke), 150
Surgical procedures, intrauterine, effect on development of primate eye (von Sallmann), 51
Symposium on effect of glaucoma on visual function (Drance, Chairman), 75
embryonic development (Smelser, Chairman), 2

T

Tear film, precorneal, and cornea in rabbit, evaporation rate of water from (Iwata, Lemp, Holly, and Dohlman), 613
Tensions, increased, arterial, oxygen supply to retina from retinal and choroidal circulations at normal and (Dollery, Bulpitt, and Kohner), 588
Tonometry, electronic applanation, in corneal edema and keratoplasty (Wind and Irvine), 620

U

U-^{14}C-glucose, studies on incorporation of, into vitreous polymers in vitro and in vivo (Berman and Gombos), 521
Uveitis, experimental, allergic (Wacker, Barbee, and Macdonald), 381
electron microscopy of (Segawa and Smelser), 497
immunogenic, antibody formation by single cells during (Smith, Jensen, and Silverstein) 373
effect of antilymphocyte serum on development of, ocular immune response (Burde and Waltman), 583
patient, light and electron microscopy on plasma cells and Russell bodies in iris of chronic (Iwamoto and Witmer), 563

V

Vascular occlusion, fetal, brain pathology following, experimental study (Myers), 41
Vesicular stomatitis virus infection in rabbit eye, role of antibody and interferon (Pollikoff, DiPuppo, and Cannavale), 488
Virus, herpes simplex, recurrence in rabbit eyes, results of three-year study (Laibson and Kibrick), 346
vesicular stomatitis, infection in rabbit eye, role of antibody and interferon (Pollikoff, DiPuppo, and Cannavale), 488
Visual field defect and ocular pressure level in open angle glaucoma (Armaly), 105
in glaucoma, examination (Lynn), 76

Visual—Cont'd
function, effect of glaucoma, symposium (Drance, Chairman), 75
Vitreous cells, cortical (hyalocytes), after photocoagulation, mitotic activity in (Gloor), 633
Volume, ocular, and common carotid occlusion in rabbit (Best, Pola, and Galin), 365
Vortex vein blood flow in animals, Doppler measurement of (Schlegel and Lawrence), 201

X

X-ray cataract, lenses with, distribution of protein within (Philipson), 271
X-rays and monkey fetal retina (Rugh and Skaredoff), 31
